

PRODUCT INFORMATION

Product Name: SF26

PRODUCT

SF26 Urethane; Polyurethane; Solvent Free Waterbased Aliphatic Polyester Dispersion

DESCRIPTION

SF26 is a translucent aliphatic waterbased urethane resin that contains no solvent and has good physical properties without the use of cross linkers. **SF26** is a single component that must be coalesced with solvents, resins or additives to form a good film. **SF26** is an extremely hard resin and provides good chemical and abrasion resistance in formulated coatings.

BENEFITS

- Solvent free **SF26** allows formulator latitude in choosing the correct co-solvent for the application
- Extremely low VOC coatings can be developed using **SF26**
- Coatings that need quick tack free properties can be formulated with **SF26**
- Imparts exceptional UV resistance.
- Imparts high chemical resistance with excellent abrasion resistance

APPLICATIONS

- Wood Coatings
- Concrete Coatings
- Metal Coatings
- Base Polymer for OEM Paints
- Exterior Paints
